WASTING YOUR PRECIOUS TIME WAITING FOR THE BUS ?

Our Solution... The SRT Application.

▶ *Functions with Adhar Card as basis.*

▶ *Designed towards Digital India(Cashless Transaction).*

▶ *Dedicated to smart travelling.*

▶ *Integrated platform.*

▶ *User friendly.*

OVERVIEW

BUS TRACKING	• Bus stop • Bus location
e-TICKETING	
AMENITIES	• Hospitals • Restaurants

Aspects

- *User App*

  - *QR code*

  - *Location based services*

- *Conductor App*

  - *QR scanner*

  - *Bus stops list*

Bus Tracking :
Bus Stops and Locations

▶ *Bus Stops are located by GPS enabled in the application.*

▶ *Once destination is selected available buses are located.*

▶ *The location of the bus selected by the user is tracked.*

▶ *Stopping details from the conductor app is fetched and the arrival time is estimated.*

▶ *Location of the bus can also be estimated using installing GPS in buses.*

e-Ticketing

▶ *QR CODE GENERATOR*

▶ *QR SCANNER*

▶ *WALLET*

e-Ticketing contd..

▶ *The conductor scans the QR code from the Adhar ID and the source is marked.*

▶ *The conductor also marks the number of passengers.*

▶ *The conductor app scans this code and marks the source.*

▶ *After the destination is reached this code is again scanned to mark the destination.*
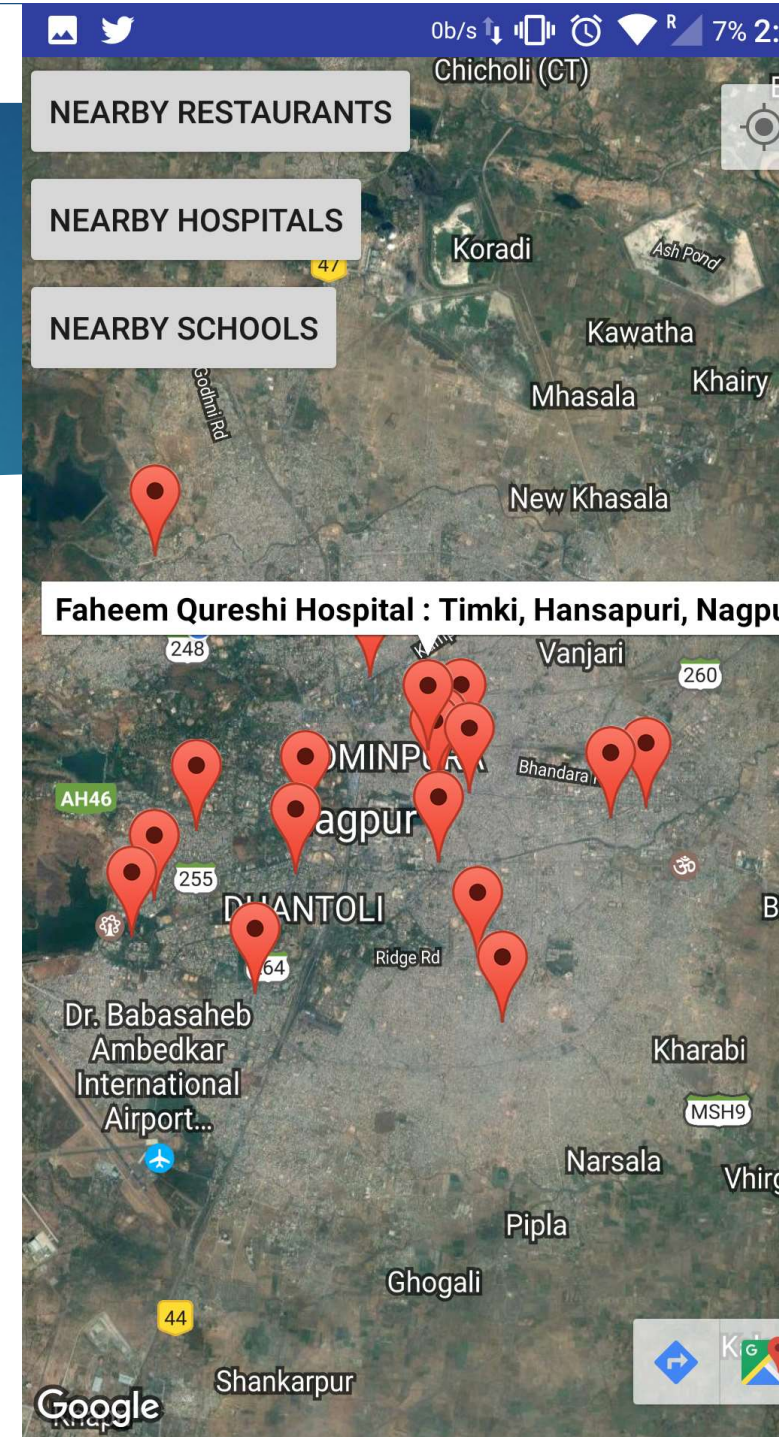

▶ *The fare of the journey is deducted from the wallet.*

Amenities
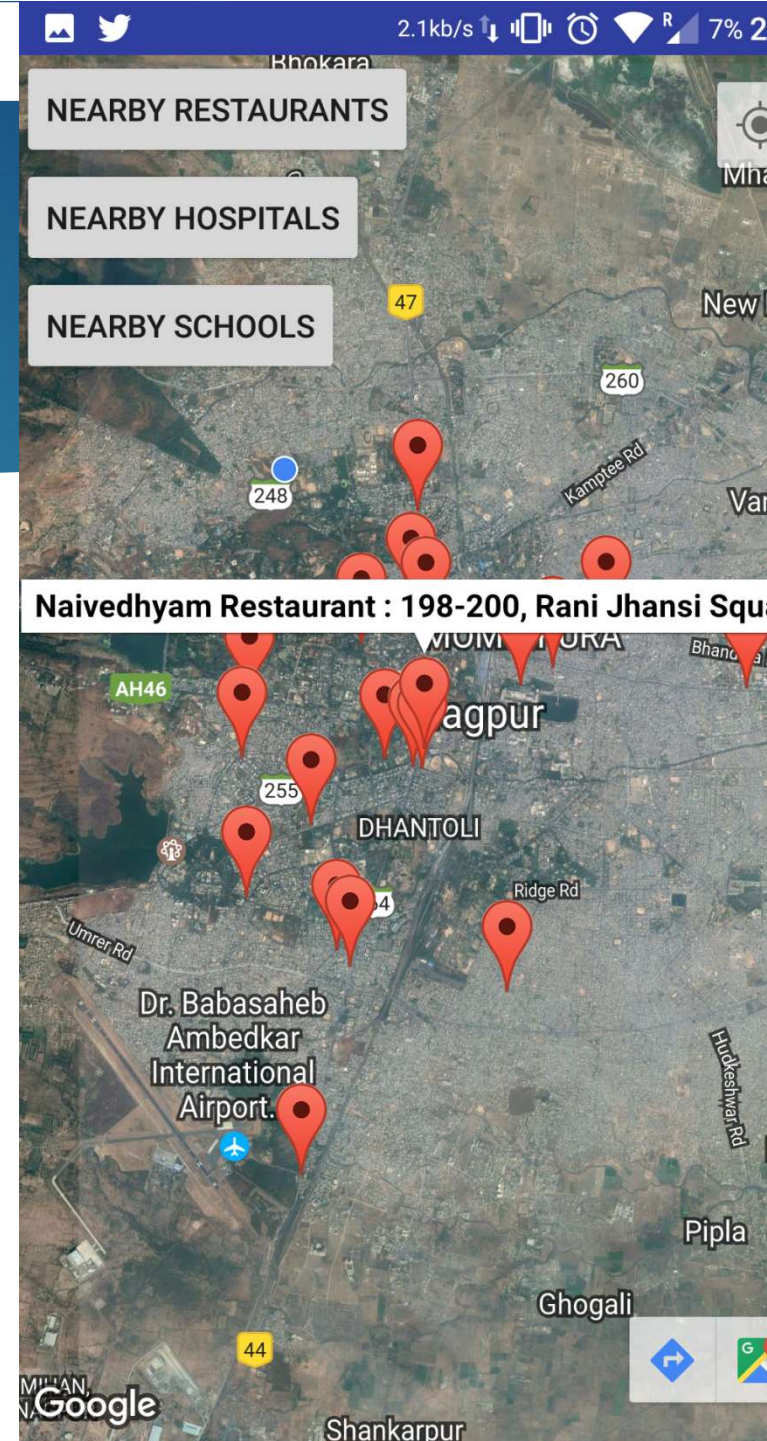

- ***Hospitals***

- ***Restaurants***

Hospitals

➢ *This enables the user to find the nearby hospitals.*

➢ *It shows the hospitals within 50Km range.*

Restaurants

➤ *The application locates the nearby restaurants thus assisting the tourists and new comers.*

Upcoming…

▶ *Enhancing e-ticketing.*

▶ *Intimating hospitals.*

Thank You!
