

## **Ready reckoners for phosphorus fertilizers** (by Dr. Jagdev Sharma, Senior Scientist (Soil Science) and Dr. A. K. Upadhyay, Senior Scientist (Soil Science)

These ready reckoners have been prepared to help farmers/ users calculate the quantity of commonly used phosphatic fertilizers for P nutrition of the vines. The figures have been rounded to nearest decimal point. The calculations have been made on the basis of minimum nutrient (N, P<sub>2</sub>O<sub>5</sub> or K<sub>2</sub>O as the case may be) contents required to be present in the fertilizer as per the specifications and composition of different fertilizers provided in 'Fertilizers Control Order of India' (Government of India, Ministry of Agriculture and Rural Development (Department of Agriculture and Cooperation). Further information on fertilizer properties can be obtained from the website of the Ministry of Agriculture and Rural Development.

To convert quantity of P to P<sub>2</sub>O<sub>5</sub> multiply P quantity by 2.29.

Example: 10 kg P =  $10 \times 2.29 = 22.9$  kg P<sub>2</sub>O<sub>5</sub>

To convert quantity of P<sub>2</sub>O<sub>5</sub> to P divide P<sub>2</sub>O<sub>5</sub> quantity by 2.29

Example: 22.9 kg P<sub>2</sub>O<sub>5</sub> =  $22.9 / 2.29 = 10$  kg P

Single super phosphate (SSP) containing 16% P <sub>2</sub> O <sub>5</sub> and 20% calcium and 11% sulphur (S)				
A	B	C	D	E
Quantity of P <sub>2</sub> O <sub>5</sub> needed (Kg)	Quantity of SSP (16% P <sub>2</sub> O <sub>5</sub> ) needed (Kg) for quantity under Column A	Quantity of water soluble P <sub>2</sub> O <sub>5</sub> in SSP under Column B (kg)	Quantity of Ca present in SSP under Column B (kg)	Quantity of S present in SSP quantity under Column B (kg)
